Installation is a Snap with **Central-Snap** from

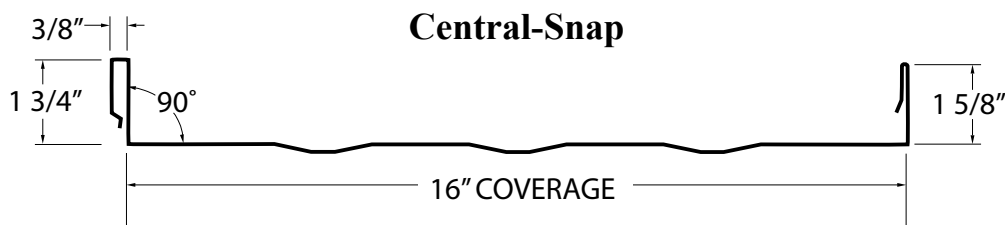

Central States offers a vertical 1 3/4" snap-lock standing seam panel system that is sturdy and fire resistant, making it ideal for architectural and commercial applications. Its Galvalume substrate offers two to four times the corrosion resistance of galvanized steel.

Comprehensive condition details are available and come attached to each order. Central States also carries an extensive line of standing seam trims and accessories to complement this panel.

Standing Seam Roofing Features:

- Subtle striations between ribs on 16" and wider panels reduce the appearance of oil-canning.
- Available in 24 gauge in 17 standard colors in the Kynar® (polyvinylidene fluoride) coating system.
- Tested in accordance with UL580 & ASTM E1592.
- Meets UL 90 wind uplift requirement for all panel widths offered.
- Should be installed over solid substrates but can be installed over open framing depending upon the panel width and support member spans.
- Available with a 1-1/8" notch at one end of the panel for the ease of turning under; reducing installation labor and costs.
- Factory applied hot melt sealant is standard.
- Snap-together panel, no field seaming required.
- Recommended minimum slope of 3:12.
